

# Did you know?

Here are ways reclaimed wood can be incorporated into a home's interior: *Accent wall:* Transforming a wall into an accent wall with reclaimed wood is a simple project that won't affect the existing design of a home's interior. A living room or home office can be given a

whole new look with the addition of an accent wall made from reclaimed wood. *Furniture:* Reclaimed wood also can be put to use, or reuse, as furniture. A home office desk made from reclaimed wood can be both stunning and sturdy, while end tables and coffee tables made from

reclaimed wood can add some unique character to a living room. *Kitchen islands:* Homeowners who aspire to have a farmhouse kitchen can consider reclaimed wood when creating their kitchen islands. *Storage beds:* Guest rooms tend to be

smaller than other rooms in the house, and that means little room for furniture like dressers. Rather than cramming lots of furniture into a small room, homeowners can utilize reclaimed wood to create storage bed frames. The frames won't take up extra space.
